

Cauchy target, $g(x) = \mathbf{1}_{\{x \geq 2\}}$ - Metropolis HMC

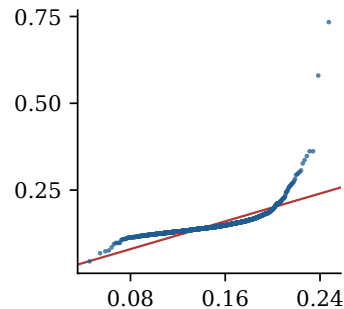

(a) Fixed
 $T = 5$

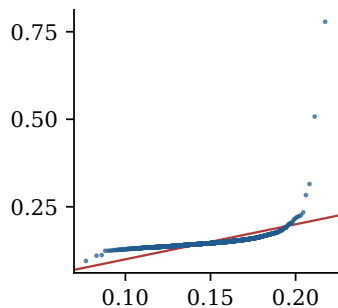

(b) Uniform
 $T \sim \text{Unif}\{1, \dots, 9\}$

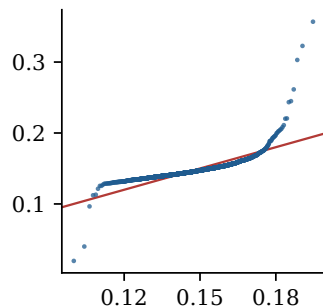

(c) Two-point
 $T \in \{1, 9\}$, equally likely

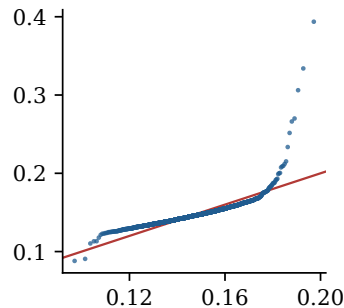

(d) Fixed
 $T = 20$

(e) Uniform
 $T \sim \text{Unif}\{1, \dots, 39\}$

(f) Two-point
 $T \in \{1, 39\}$, equally likely

Fitted normal quantiles

2,000 independent chains; 20,000 retained iterations per chain

Ergodic averages
